

JEREMIAH ZHIYA

FULL-STACK DEVELOPER

Abuja, Nigeria • jerryglitter399@gmail.com • +234-703-993-3513 • github.com/jerryzhiya

PROFESSIONAL SUMMARY

Detail-oriented and resourceful Full-Stack Developer with a proven track record of building robust, responsive web applications and secure backend systems. Skilled in modern JavaScript frameworks, database management, and implementing secure user authentication protocols. Passionate about engineering high-performance digital solutions and mentoring aspiring developers to cultivate industry-standard engineering practices.

CORE TECHNICAL SKILLS

Frontend: React, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, TypeScript	Backend: Node.js, Express, RESTful APIs, JWT, EJS, Databases	Tools: Git, GitHub, Postman, NPM Package Management
--	---	--

PROFESSIONAL EXPERIENCE

Full-Stack Developer Alkebulan Foundation	Freelance Contract
--	--------------------

- Engineered and deployed a high-performance web platform utilizing a modern JavaScript stack to support the foundation’s digital outreach.
- Designed and implemented a secure user authentication system using JSON Web Tokens (JWT) and secure cookie storage for robust session management.
- Developed RESTful API endpoints for dynamic content delivery, data persistence, and secure user login/registration flows.
- Crafted a fully responsive, intuitive frontend interface, significantly improving user engagement and cross-device accessibility.

Full-Stack Developer Freelance Developer	Remote
---	--------

- Architected end-to-end web applications and personal portfolios utilizing React, Next.js, and Node.js.
- Styled modular user interfaces using Tailwind CSS to ensure strict adherence to modern UI/UX and mobile-first responsive design principles.
- Connected client-facing interfaces with robust backend services, leading to faster data processing and optimized web performance.
- Managed database queries and API routing structures to provide clients with smooth, dynamic content management capabilities.

Technical Mentor Next Generation Builders	2025 – Present
--	----------------

- Teach web development fundamentals including HTML, CSS, JavaScript, and React to aspiring software developers.
- Guide students through full-stack architecture concepts, fostering hands-on learning through real-world project builds.
- Conduct comprehensive code reviews, teach debugging methodologies, and instill industry-standard Git workflows.
- Provide career guidance and mock technical interviews to assist developers transitioning into professional technology roles.

EDUCATION

B.Sc. in Computer Science — [ISCG University, Benin Republic](#)

2019 – 2022
